Planning a Remodel?

Don’t Forget the Benefits of Clean, Efficient
Natural Gas Appliances

Call our Marketing Department • 402.504.7981 • mudomaha.com
The National Association of the Remodeling Industry (NARI), the only independent association dedicated to the remodeling industry is a not-for-profit trade association with more than 50 years of industry experience. NARI represents professional remodeling contractors, product manufacturers, distributors, wholesalers, trade publications, utilities and lending institutions. NARI is committed to enhancing the professionalism of the remodeling industry and serving as an ally to homeowners.

NARI members have access to the latest information in the industry through publications, educational programs and seminars, and conferences.

The NARI professional remodeler pledges to uphold the association’s strict Code of Ethics and is dedicated to advocate professionalism and integrity.
On the Cover

Gitt Construction Inc. has been owned and operated by Mike Gitt since 2006 and is recognized as one of the Omaha Area’s premier remodeling companies. We serve Sarpy and Douglas Counties along with parts of Washington, Dodge, Saunders and Cass Counties.

Whether you’re planning a kitchen or bath remodel, an addition project, or a whole-house remodel, you’ve come to the right place. We are a design-build firm based in western Omaha with over 12 years of experience working on home remodeling projects throughout the Omaha Metro Area and hundreds of satisfied clients.

In 2018, we opened our full-services design remodel showroom, a retail store in Omaha featuring exclusive cabinetry, countertops, plumbing fixtures, tile, lighting and more.

Gitt Construction Inc. was awarded, on September 27, 2017, by REMODELING Magazine, a nationally known publication, to join the REMODELING Big50 for 2017.

Photos by Thomas Grady Photography
The goal of the National Association of the Remodeling Industry (NARI) is to help homeowners find the right professional partner to do their remodeling. Whether it is updating a kitchen to make it more efficient, turning an ordinary bathroom into a haven of rest and relaxation, or adding a room to meet the needs of a growing family, NARI wants each homeowner to get the maximum value or enjoyment for the dollars they invest in their remodeling.

NARI membership means that a professional is a full-time, dedicated remodeling expert. NARI membership requires its members follow a strict Code of Ethics, and there is a grievance process that can be pursued when they do not.

Homeowners can be assured that any time they hire a NARI member, they are hiring an individual who has made a strong commitment to the professionalism of the remodeling industry and to his or her business.

NARI members have access to the latest information in the industry through publications, educational programs, educational seminars and conferences.

You can use the Buyer’s Guide on page 52 of this magazine or the “Find a NARI Professional” tool at omahanari.org to find a NARI member to create your dream space.

What does NARI membership mean to me as a homeowner?

Take pride in your home, hire a professional...

A NARI Member!

Each member of the National Association of the Remodeling Industry is pledged to observe high standards of honesty, integrity and responsibility in the conducts of business by:

- Promoting in good faith only those products and services which are known to be functionally and economically sound, and which are known to be consistent with objective standards of health and safety.
- Making all advertising and sales promotion factually accurate, avoiding those practices which tend to mislead or deceive the customer.
- Writing all contracts and warranties such that they comply with federal, state, and local laws.
- Promptly acknowledging and taking appropriate action on all customer complaints.
- Refraining from any act intended to restrain trade or suppress competition.
- Obtaining and retaining insurance as required by federal, state, and local authorities.
- Obtaining and retaining licensing and/or registration as required by federal, state, and local authorities.
- Taking appropriate action to preserve the health and safety of employees, trade contractors and clients.
Never settle

Handcrafted in America to be the best of the best, Cambria’s natural stone surfaces are complex and compelling with incredible elegance, movement, and flow found nowhere else. Find your dream kitchen or bath at CKF.
Omaha NARI believes in giving back to the community in which members live and work. Each year, the Omaha NARI chapter has community involvement where financial contributions and volunteer time is provided to many local organizations and charitable events in the Omaha Metro community.

This past October, local members of the Omaha NARI chapter gathered materials and volunteers to provide facility updates for the South Omaha Victory Boxing Club, as part of their commitment to give back. The project involved installing mirrors and fluorescent lighting in all restrooms, construction and mounting of a twenty-eight-component storage unit for gloves and other equipment, installing new wiring and conduit for three new ceiling fans and replacing over twenty-five broken window panes.

The following Omaha NARI Members donated materials and labor to the project: Bratetic Construction, Inc., Castle Glass LLC, Contractors Siding, Window & Roofing Supply, Completely Square, Echo Systems, Habitat for Humanity ReStore, Identity Marketing Group, KLP, Inc., Lowe’s Home Improvement of Papillion, OHARCO, Inc., Superior Home Improvement, LLC, Quinn Insurance, Inc. and Window Innovations. All electrical work was provided by local NARI member, Rick Peterson, of Universal Electric and his electrical crew.
Welcome to the home YOU LOVE TO COME HOME TO.

When your house is this inviting your heart never leaves home. Every detail adds to the joy of returning – every day.

Framed in beauty, a home with James Hardie® siding, trim and rich ColorPlus® Technology finishes set the stage for those times when time stands still. Their authentic charm will last nearly as long as the memories you make here.

When you are ready to remodel your home, make sure you keep this handy checklist close by!

- **Write It Down**… walk through your home and write down all the dreams you have for it.
- **Cut It Out**… find pictures in magazines of tile, paint colors, cabinets, countertops, and appliances that you like.
- **Plan It Out**… figure out your financial resources so you know how much you can spend on a remodel project.
- **Call the Best**… look to Omaha NARI for your best resource for professional, ethical and experienced remodeling companies, subcontractors and suppliers.
- **Do Your Homework**… call the contractor’s references, ask to go see at least one of their remodeling projects.
- **Give in to Your Gut**… the remodeling contractor or subcontractor will “live” with you and your family for days or weeks or months. Your gut feeling tells you if you are comfortable with this person!
- **Define the Details**… your remodeling proposal and/or contract should be comprehensive and include product descriptions, start and approximate completion dates, payment schedule, change order procedures, warranties, and alternative dispute resolution clauses.
- **Keep Your Perspective**… remodeling can be disruptive to your normal household environment. Take a deep breath, keep your focus and work with the remodeling contractor or subcontractor for the end result.
- **Celebrate the Dream**… invite your family, friends, neighbors to see your new remodeling project…and start dreaming about the next one!
How important is it for my remodeling contractor to be licensed and insured?

It's very important. Licensing and insurance are required in the City of Omaha and many surrounding areas. Ask for proof of licensing or call the issuing municipality to verify the license. For insurance, ask for a proof of insurance or call the insurance company with whom the contractor is insured to verify coverage.

There are so many from which to choose. How do I select my remodeling contractor?

It's best to employ a home improvement contractor with an established business in your area. Local firms can be checked through references from past customers in your community or through your local Better Business Bureau. Local remodelers are compelled to perform quality work that satisfies their customers for their business to survive. Many states, but not all, require contractors to be licensed and/or bonded. Contact your state or local licensing agencies to ensure the contractor meets all requirements. Ask the remodeling contractor for a current copy of their license. You can also check with the government Consumer Affairs Office and the Better Business Bureau to ensure there are no complaints on record for the contractor. Ask to see a copy of the remodeling contractor's certification of insurance for the name of his or her insurance agency to verify coverage. Most states require a contractor to carry worker's compensation, property damage and personal liability insurance. Make sure the contractor's insurance coverage meets all the minimum requirements.

How much should my remodeling project cost?

This really depends on the size and scope of your project. The materials chosen, the size of the room, and age of the infrastructure can all impact the project cost. Remember when you are comparing bids, that you are comparing the exact same scope from each contractor. If a price comes in that looks too good to be true, it probably is. How much value will my remodeling project add to my home? This also depends on the scope of your project, and you may be surprised which projects add the most value.

How long should my project take?

Again, this depends on the size and scope of your project, and what is found during demolition. Unforeseen problems can pop up once walls are taken down, and these new issues can require additional work. Ask your remodeling contractor for the most reasonable time-frame and stay in touch with him or her as the project progresses, so you can plan for a finish date.

Should I plan more money than the contract price?

Additional work or a change in the project requested by the remodeling homeowner usually require a contract price change. Planning for the unforeseen is wise, though, so putting aside an extra 10% over the contract price makes for a less stressful remodel.

How many estimates should I get for a remodeling project?

You can go about the process in different ways. Conventional wisdom dictates three estimates for any remodeling work you are going to have done. However, if a home improvement contractor comes highly recommended by a trusted source, and you have met and talked with the contractor and feel comfortable working with him or her, getting additional estimates may not be necessary.

I have three different estimates, and the prices vary greatly. Why?

There are a number of different factors that go into pricing a remodeling project. Be sure that every estimate has the same scope of work. If the estimates are vague and you cannot interpret that information, go back to the contractor for clarification in writing. If you are unable to get adequate written clarification, it may be wise to eliminate that remodeling contractor from the bidding process.

What can I expect to do while a remodeling project is being done in my home?

Most importantly, keep the lines of communication open between you and the remodeling contractor and the work crew. Ask questions. Let them know what your family schedule is and whether you have pets confined somewhere. It's important to keep the work areas off limits to children and pets for their safety; however, you may have a little extra dust and dirt in your house, so keeping the work area off limits will avoid them tracking the dust to other parts of the house.
When it comes to your dream home – making sure it is perfect means tons of tough decisions. Let our knowledgeable product experts relieve the stress and restore the fun while introducing you and your design team to our extensive collection of products from the most sought after brands. On behalf of The National Association of the Remodeling Industry (NARI) and myself, I want to thank you for looking through all the companies advertising within the magazine and hosting projects on the tours. I know your time is valuable and a lot of it went into the design of the ads. Without the support of our sponsors this magazine would not be possible, so a big thank you goes to all of you as well.

There is a lot that goes into being a member of NARI. All our members are held to a strict code of ethics. We keep requirements such as proper insurance and licensing. We keep a healthy sense of competition with every contractor and even though we are competitors, we develop friendships every year.

Our members should be rightfully proud for what they do day to day. They exceed customers’ expectations with design, development and commitment to quality, on every project. No matter the size of your project, be sure to take the time and visit with these amazing contractors. Ask questions regarding their project from start to finish and be inspired for your next project. Nothing says thank you more to the contractors, than having clients open their homes for the weekend. It means the world to a contractor to be recognized for all their hard work. Thank you for allowing all of us to tour your home.

To all the members, please take advantage of this magazine to showcase your projects. You should be proud of what you do every day and the best way to show off your skills, is to advertise. It does not have to be a full tour, but consider the benefits an advertisement could give your business. Excel in everything you do and I look forward to an exciting 2018.

This special owner was ready to take their space from outdated 80’s vibe condo to a modern day contemporary home. Gitt Construction Inc. completed remodels on both the main and master baths, running vertical deco accents in accompanied with large elegant marble tile. The showers were further enhanced with relaxing “spa like” pulse shower systems. In the master bathroom, simple glass doors on a sleek roller track created a modern focal point in the space. Modest updates to the kitchen backsplash, along with Pergo flooring, updated wall coloring, and various accent walls throughout, transformed the look and feel of the home beautifully.
Gitt Construction Inc. has been owned and operated by Mike Gitt since 2006 and is recognized as one of the Omaha Area’s premier remodeling companies. We serve Sarpy and Douglas Counties along with parts of Washington, Dodge, Saunders and Cass Counties.

We have been working with this couple for a few years now. We remodeled their bathrooms and added an all season room to the back of the house. We were ecstatic when they reached out to us to remodel their kitchen.

Our clients decided it was time to open up their kitchen and create a welcoming country home feel. We started the project by removing everything in the existing kitchen, down to the studs. We removed a wall that was separating the kitchen from the dining room and added a pocket door to their laundry room. Once we had the clean slate, we were able to create their dream kitchen. We ran new electrical to allow in cabinet lighting and under cabinet lighting. Once the drywall was completed, we highlighted their amazing dishware in a few of the new upper white cabinets, with glass doors and accented lighting. By removing the wall between the kitchen and dining room, it gave space for a large island. Our clients are consistent bakers and love the extra quartz countertop. We are also able to incorporate a nice desk area off the kitchen cabinets for a much needed working space. Beautiful tile was integrated into the kitchen flooring, backsplash and garden window ledge. After the finishing touches and new appliances were put into place, our clients were able to enjoy the benefits of their new open kitchen.
Superior Home Improvement, LLC (SHI) in Papillion, NE is a family owned business founded by David and Susan Benson in 2004. We specialize in bathroom and kitchen remodels, basement finishes, and decks. We have trusted partnerships with professionals in design, drafting, engineering, electrical, plumbing, flooring, tile work, HVAC, and a variety of other trade specialties in residential construction. Our mission is to help people improve their lives by improving their homes. Whether you want to freshen up your bathroom or create your dream kitchen, we want to help make your vision a reality.

Jenkins Remodeling, LLC fully renovated all three outdated bathrooms of this home. The master bathroom was completely redesigned, replacing an unused jacuzzi tub with a large walk-in shower. A new double vanity and quartz countertop completely updated the look of the room. A floor to ceiling custom cabinet tucked away in a separate room accompanied with a stool, provides the homeowners plenty of storage space. The second floor hallway bathroom was totally redone with a new tub and tile shower surround. The double vanity in this bathroom provides ample space for guests. The powder bathroom on the main level received a new custom vanity, quartz countertop and a storage cabinet above the stool. This is just one example of how Jenkins Remodeling, LLC can bring new life to your home.
Jenkins Remodeling, LLC is an owner operated company whose primary goal is customer satisfaction. We achieve this by working closely with the homeowner throughout the project and by using only the best subcontractors and suppliers. Since 2007, Jenkins Remodeling, LLC has specialized in bathroom and kitchen remodels, basement finishing, and whole house remodels. We are fully licensed and insured and serve the entire Omaha metro area.

Universal Electric
A two-story addition expands the home’s square footage, not only enlarging the kitchen and great room, adding a pantry and beverage area, but also increasing lower level storage and space for the kids’ media room. Design updates improve the traffic flow, creating uninterrupted work space in the kitchen. A multi-purpose island is central to the kitchen’s work activities. Whether preparing, cleaning, socializing, serving or dining, the expansive countertop space provides limitless options.

Wood-plank floor tile in a sophisticated herringbone pattern is exquisitely laid throughout the main level, contrasting with the luxurious plush carpeting of the living room. Richly stained tobacco-colored island and buffet cabinetry creates visual warmth against the bright, crisp white painted cabinetry and trim. Quartz countertops simulate the natural beauty of soapstone and marble materials, yet remain durable for the high-use kitchen surfaces. A custom mosaic tile accent and decorative lighting complete the transformation.

Now you’re cooking.

Comfort in your home.

When you choose natural gas appliances for your home you are making a responsible energy choice. Natural gas is efficient, reliable, comfortable and clean. Homes with all natural gas appliances can save up to $1,124 annually!
Clean, affordable natural gas.

Homes with natural gas appliances reduce carbon dioxide emissions up to 75 percent compared to all-electric homes. With lower energy bills and convenient amenities, natural gas is the right choice for the planet and your family.
This customer purchased this house to be closer to her daughter and grandchild when she’s visiting Omaha. She entrusted Gitt Construction Inc. services to create a spacious timeless feel for her Omaha home away from home. Mike Gitt and his team got right to work upgrading the master bathroom, main bath, entryway, and floors throughout the main level. The entryway consists of custom patterned natural Slate tile, a dark stained Therma Tru entry door, and elegant lighting and fixtures to enhance the space.

Creamy white cabinets with brushed brass hardware and custom butcher block counters made the kitchen warm and welcoming. The upgraded living room fireplace surround and coordinating rich wood flooring throughout, tied the spaces together. In the basement, the flooring was upgraded with rich-toned Cali Bamboo and an updated fireplace surround. New countertops and fixtures in the kitchenette finished off the classic look and feel of the space.
Gitt Construction Inc. was awarded, 2017 REMODELING Big50 by REMODELING Magazine, a nationally known publication. Whether you’re planning a kitchen or bath remodel, an addition project, or a whole-house remodel, you’ve come to the right place. Check us out at GittDBR.com to read our exceptional customer reviews and schedule an appointment.
This project began with the desire for a pantry and more functionality in the kitchen. The homeowners needed a space that felt light and contemporary for entertaining and was also highly functional, putting everything needed to prepare a meal within their reach.

Light-gray maple cabinets were chosen to give light and warmth to the kitchen. The black island adds a dramatic contrast, which ties in aesthetically with the fireplace built-ins of the family room. Glazed subway tile adds a modern detail to the updated kitchen. And finally, addressing the first concern, the idle desk was replaced with a floor-to-ceiling pantry for the extra storage space they needed.

In the family room, the traditional brick fireplace and oak cabinets were removed for the update. Wild Horse stone was chosen to surround the new fireplace, and a reclaimed wood beam used for the mantle. Classic black cabinetry and floating shelves on both sides of the fireplace give the family room a fresh, modern feel.

The homeowners decided to complete the project with a powder bath facelift. The main elements of the room were in good condition, so scraping the popcorn ceiling and adding classic wallpaper was enough to give this powder bath an updated, yet classic, quality.

The homeowners did expect the job to be done as they wanted, but what they didn’t expect was how Gary handles the process of a remodel. One of his top priorities is to keep the homeowner’s house clean and livable during all remodeling projects. In this case, he was able to hook up a temporary sink area in the basement for use while their kitchen was being transformed. In addition to dust protection sheets, HC Remodel & Design uses Build CleanTM Dust Control Systems during the remodeling process to prevent dust from ruining electronics and keeping the home safe for children and pets. Our attention to their living space during the remodeling process removed a lot of the stress that usually comes with major home renovations.

We care about the people we work with and we care about making your home a place you love to live.
Gary Haldeman is a residential remodeling contractor with over thirty years of experience. He began his career with his family’s construction company in Central Iowa before starting his own remodeling company in the Omaha metro area. His close attention to detail and ability to utilize space effectively, along with the high level of craftsmanship he brings from his experience as a finish carpenter have allowed HC Remodel & Design to become one of the highest recommended Design/Build Firms in the Omaha area. He is a Certified Remodeler with the National Association of the Remodeling Industry.
Expectations are a big part of what can make or break your renovation.

We understand that remodeling is a messy and disruptive experience, by its very nature. As contractors, we do everything we can to make your time during construction as easy to live through as possible. Most of our customers live in their homes while the remodeling work is being completed, and while most people are somewhat prepared for the dust, noise, and disruption of the renovation, it can still be something that requires some adjusting. Our commitment to livable remodeling helps to make some of the daily challenges of living in a construction site, a bit easier for you and your family.

Communication

Communication during a project between you and your contractor is very important. For example, at Gitt Construction Inc., all remodeling projects are assigned to Buildertrend, our dedicated project management tool. A project superintendent will help to manage your home remodel. In addition to working with your designer, who remains in consistent contact with you throughout the renovation, you will be working closely with your personal project superintendent. The superintendent plays a huge role in keeping you updated, keeping the project flowing smoothly, and answering the inevitable questions that arise during construction.

Timing

One of the biggest questions on your mind will be “how long will it take?” To help give you a sense of what to expect, the contractor should provide you with an estimated schedule of how the work will progress, which includes the target completion date. You’ll have daily communication with your project superintendent to stay abreast of what’s planned for today, how things are progressing, and to answer any questions or concerns you might have. We know that you are anxious to make it through construction and enjoy the new space, so we do everything we can to help you get there as efficiently and quickly as possible.

Cleanliness

Cleanliness is a priority for each and every project, and you’ll find that we take some additional steps that aren’t typical in our industry to contain the mess and the dust often associated with construction. The work area will be contained as much as possible by plastic barrier walls with zipper entrances. Carpeted areas in the path of tradesmen will be covered with plastic. At Gitt Construction Inc. each and every job also has an air scrubber with a HEPA filter by Build Clean that does a particularly good job of removing airborne dust before it can get to the rest of your home. Our craftsmen will clean up their work areas at the end of each day, and at the completion of the project, a professional cleaning crew will do a thorough cleaning of your newly remodeled space.

Safety

Homes built prior to 1978 might contain lead paint, so we check for lead prior to renovation work beginning, and always follow Lead Safe work practices when lead is detected. Gaining certifications for lead safe and OSHA (general safety) keeps our team on top of the latest advances in health and safety for our team as well as your family.

Accessibility

At Gitt Construction Inc. we use use a lockbox to control access to your home for the tradesmen, which leaves you free to schedule your time as you see fit, no need to wait around to let people in and out of the house. We also provide portable toilets for the tradesmen so that they do not impact the other areas of your home any more than necessary.

This is your home, and while it also becomes a worksite, we never forget about the families that we are impacting on a daily basis.
Omaha NARI is committed to building a strong industry image. We are focused on educating consumers to make smart remodeling decisions. Nationally, NARI has over 7,000 member companies that represent over 40,000 remodeling industry professionals who must be insured and registered in the trade to belong to the association. NARI is also known through the national websites www.nari.org and www.remodeltoday.com along with many promotional spots on national and local television.

Excellence. Integrity. Professionalism.

When consumers hire an Omaha NARI member, they're working with an experience professional who adhere to NARI's Code of Ethics and Standards of Practice, rated #1 value by NARI members. Omaha NARI members are vetted to comply with the following:

- In business for a minimum of one year. Over 75% have been a NARI member for over 3 years
- Carry all licensing and insurance required by the federal, state and local authorities
- Hold to the highest industry standards, ethics and business operations
- Invest in knowledge, skill development and quality production
- Access latest information through publications, education and conferences
- Enhance the professionalism of remodeling
- Be an ally to clients

Omaha NARI's website makes it easy to find a remodeler in your area. Get inspired-learn the importance about certifications and the benefits of using an Omaha NARI member all in one place.

The homeowners were looking to finish their basement and desired a personal design that would showcase their family heirlooms. Josh spent time with the clients and developed ways to implement personal touches from their family farm into the design and finish of their basement.

The fireplace mantle was created from a walnut tree that was planted on the family farm in the early 1900’s. Hintz Construction also used this walnut to create custom floating shelves with an accent strip light cut into the shelf. The clients were ecstatic to be able to incorporate this 20-year-old tree from their family farm. The barn door was made from a chicken coop from the farm that was built around 1910-1920. Hintz Construction collaborated with the client to customize this door, as it would have to be enlarged to fit the space properly. The accent wall that showcases many of the client’s family heirlooms and pictures was also taken from the family farm. Hintz Construction used these pieces of wood to create a custom wall to display their favorite pieces. The trim around the door was also removed from one of the client’s great uncles farm house. The hardware used on this door was a 100-year-old as well.

After completing the basement remodel, the clients wanted Hintz Construction to create a more custom master bathroom and closet. Josh worked with the clients to remove a guest bedroom and expand the master suite and closet into this space. The clients were looking for a more modern retreat in this space and this was obtained with the selections the client made. Josh worked with the client to create a better flow in the master bathroom and create a larger and custom shower. By removing the guest bedroom, the clients were also able to achieve a larger and more functional master closet as well.
Hintz Construction Inc. is a remodeling company that specializes in kitchen, bathroom, and basement finishes. Owner, Josh Hintz, has been in the construction industry for 17 years. Josh's main goal is to create spaces for his clients that are functional and meet their needs. He enjoys working one-on-one with each client to make their dreams come true. Hintz Construction Inc. is a fully licensed remodeling contractor.
Two young professionals with a growing family were looking for a space that would be great for entertaining and the ability to grow their family. Top of their wish list in a home was an open concept and a large island for family time and entertaining guests.

When this home was purchased, neither of those requirements were present. Highrock Design.Build.Remodel showed the homeowners that this was a very achievable dream. The first hurdle for this project was removing a load bearing wall that separated the kitchen and living room. After a 1800lb beam was added to the main floor, the project was on its way. Highrock Design.Build.Remodel completely demoed the kitchen, reconfigured the layout and ensured there was a large island to complete the client’s wish list.

To add some custom touches Highrock Design.Build.Remodel added a subtle yet impactful ceiling detail in the living room. They also refaced the fireplace and added custom cabinets around the fireplace. Other finishing touches included LED lighting, smart thermostat, solar attic fans for energy savings and automated blinds for comfort and convenience. Highrock Design.Build.Remodel was able to achieve all of the homeowner’s wish list and complete it with the modern design trends of the grays throughout, white kitchen cabinets, a gray island, darker doors, wall paper in the powder bath and rich wood flooring throughout.

“The home turned out even better than we could have ever expected. We are constantly complemented on how beautiful our home is while still being a practical space with exceptional flow,” said Megan, the homeowner.
Highrock Design.Build.Remodel, an award-winning building and remodeling team owned by Aaron Hochstein, is dedicated to exceeding customer expectations each and every time. We pride ourselves on our quality craftsmanship as well as impeccable service and attentive communication. We specialize in REMODELING PROJECTS ranging from $10,000 to $400,000 and NEW CONSTRUCTION from $400,000 to $1.5 million and up. We enjoy what we do, from initial consultation to providing the finishing touches. We have a passion to please our customers along the way. Whether it is a kitchen, basement or bathroom renovation, a complete teardown and rebuild or a new construction, Highrock Design.Build. Remodel can meet your needs.

Benefits of Natural Gas

Appliances

When choosing natural gas, there are many appliances to select from.

• HIGH-EFFICIENCY FURNACE - Heat from a natural gas furnace or boiler feels warm and cozy. That’s because the air is approximately 25 degrees warmer than the heat produced by an electric heat pump.

• WATER HEATING - Natural gas water heaters heat water twice as fast as electric. That means you don’t have to wait as long for the system to recover before you can use more hot water.

• COOKING - The burners on your gas cooktop/stove turn on instantly and heat up faster than an electric range. The visible flame and instant on/off function are also an important safety feature for your family.

• CLOTHES DRYER - A natural gas dryer heats up faster than an electric one - and stays hot longer. This saves you both time and money. You can dry up to two loads of laundry with a gas dryer compared to drying one load with an electric dryer.

• HEARTH PRODUCTS - Natural gas hearth products offer simplicity, convenience, and efficiency that can’t be beat. Once you try gas, you’ll never go back to wood.

• OUTDOOR LIVING - Transform your backyard with a natural gas grill, outdoor fireplace, fire pit, tiki torches and patio heaters. They will transform your backyard into a retreat and you never have to worry about running out of fuel.

Today, everyone is trying to reduce their carbon footprint. One of the easiest ways is to choose natural gas for your energy needs. Natural gas is domestically abundant and environmentally friendly. More than 90 percent of the energy produced as natural gas is delivered directly to your home compared to just 27 percent for electric power. As a result, carbon dioxide (CO2) is greatly reduced; up to 75 percent decrease when using gas appliances. This quality is one reason why natural gas is the cleanest of all fossil fuels. Choose natural gas when replacing old appliances or building a new home. You save money, and retain market value of your home. Your choice will help the environment and future generations.
Feeling constrained by the wall dividing the kitchen and living area, an expansive cased doorway was framed, visually opening the space and creating a cohesive transition between rooms. Traffic patterns easily flow through the main level, maintaining the kitchen’s working triangle and allowing smooth passage to living and dining spaces. A central island is the focal point of the kitchen and provides limitless options for preparation, clean-up, socializing, serving and dining.

Inspired by the rich color palette of the Persa White granite countertops, warm grey walls and deep wood tones create a soothing atmosphere. The addition of crown molding and freshly painted trim and doors is refreshing and brightens the home. A new fireplace framed with stacked stone, storage cabinetry, and floating shelves creates an ideal space for the media center and wall-mounted TV.
T. Hurt Construction has been awarded NARI CotY Awards for the following projects:

2016 – Regional Winner – Residential Addition $100,000 to $250,000

2015 – Regional Winner – Residential Historical Renovation/Restoration

2012 – Regional Winner – Home Theater/Media Room Under $150,000

2010 – National Winner – Residential Historical Renovation/Restoration

2009 – Regional Winner – Residential Interior Under $100,000

At T. Hurt Construction we ensure a pleasurable remodeling and building experience, and make customer satisfaction our top priority. We have experienced craftsmen on staff and use only the best sub-contractors and suppliers.

T. Hurt Construction specializes in the following:
• Whole House Remodels
• New Construction
• Lower Level Finishes
• Custom Kitchen and Bath Remodeling
• Additions and Garages

2018 OMAHA REMODELED  |  41
As we languish through each winters' bitter embrace we long for the springtime. When the warmer weather finally arrives, it brings with it a return to the backyard...to barbecues, pool parties and evening chats with friends around the glow of a firepit. Perhaps in warmer climates this is taken for granted. But here in the middle-United States, we clamor for the outdoors when the seasons permit it.

So, what happens when we go outside? Do we forget that we have been attached at the hip to our phones, glued to televisions for sporting events or movies on a cold night or soothed by music streaming over our in-home speakers? Absolutely not. We are hooked, and increasingly expect these forms of entertainment to follow with us as we emerge in the spring.

Outdoor living and entertaining is a rapidly growing demand from consumers. Not only do they want decks and patios, firepits and outdoor kitchens, pools and spas, well-manicured lawns and elaborate landscaping; but they also want their in-home technology to extend to their outdoor space.

Fortunately, the tech industry has evolved to meet these demands. There are alternatives to large unsightly surface mounted speakers on the side of a house, or fake rock speakers that don’t actually resemble rocks. The industry now offers discreet landscape speakers that imbed in the foliage to surround homeowners in soft, well distributed music. No more do we have to worry about house mounted speakers projecting out into the neighborhood, preventing us from entertaining our friends late into the evening. We can now surround ourselves with low level music that won’t disturb our neighbors.

Want to catch a football game? Outdoor video is becoming increasingly commonplace. Plan to use an indoor TV outdoors like many do? Standard televisions are not meant to live outdoors. They are a shock hazard, not being UL approved for outdoor use, and the image is designed for a light controlled environment. From a weatherproof television to a large glass panel in the side of the house with a projector mounted safely inside to present a 120” or larger image that is easily viewable from across a pool. Or a display that motorizes out of a cabana or up from a retaining wall. We like our TV’s! It is important to offer clients options that work with the aesthetic of their outdoor design.

Don’t forget Wi-Fi. Just because we want to commune with nature doesn’t mean we aren’t checking stocks, keeping up on the news or streaming music. The typical indoor wireless network is inadequate for our daily needs as it is. Advances in windows, doors and insulation further hamper our efforts to extend the wireless signal. Special steps need to be taken to not only improve indoor wireless coverage but also extend that coverage to the outdoors in a robust but secure way.

Finally, we need to keep an eye on our investment in outdoor living. Specifically, well placed cameras so that we can monitor and secure our newly installed outdoor kitchen or television is recommended. If a pool or spa is being considered, it is especially important to maintain a clear camera view for liability purposes, or to keep an eye on kids playing in the backyard. Cameras may also need to be considered out front so that when a guest pulls in your driveway or rings your doorknob you can see them approach from your smartphone and...
tell them to grab themselves a cold beveridge on their way through the house to the backyard entertainment area. You may even want them to grab you another one while they’re at it.

As dismal as winter can be……it will end. With it will come phone calls from our customers asking for help in designing the perfect outdoor living scenario. While they may not have thought about all of the things they need to consider, it is our job in the remodeling industry to educate our clients on what is available and popular. Heaven forbid we complete a project without mention of technology and they happen to go to their neighbors’ house and see well placed speakers, an outdoor television, excellent Wi-Fi and discreet cameras.

Visit with an AV specialist with a similar aesthetic vision and ability to service your clients. Resist the urge to fear that a client will get overwhelmed by the price or assume they aren’t interested in technology. After all, they’ve been using technology all winter. Let’s not disappoint them when they head outdoors.

Engage your Vertical Space

Clean lines for furniture and décor are still top trends. Consequently, you can go beyond paint for your walls and do something unexpected. We have seen homeowners using a variety of mediums to create wall texture with hundreds of new options appearing every year.

In this Council Bluffs home, we kept the colors subtle and made a statement with texture. The bathroom is one of the easiest places to try on an accent wall with a unique surface because floor to ceiling tile not only looks gorgeous, but it is functional in this room that gets the most humidity and water penetration. Covering an entire wall with beautiful glass tiles gives this contemporary bathroom retreat a glamourous dose of character.

Looking for more accent wall ideas? Here are some of our favorite textures: stone, textured wallpaper, custom finishes using a drywall artist or professional faux finisher, and wood paneling. We also love some of the new options with Formica™ and ModularArts™ wall panels and tiles.

Go for Warmth with Wood

Natural textures give you a warm feeling inside. Stick a rustic cedar stump in the middle of a contemporary bathroom and you get a place that feels clean and relaxing. Or line the walls with wood paneling and you have a comfortable and cozy atmosphere, no matter how modern the décor is.

In this Omaha home we gave woodwork the mainstage. Custom paneling on the walls takes this room to upscale status while the exposed ceiling rafters brings it back to casual comfort. Another classic, the barn door, gave us an excuse to expose some rustic hardware along with a chic chevron pattern.

Shiplap and reclaimed wood are also making their way into many homes as manufacturers make installation so easy for DIYers, but if you team up with a quality finish carpenter then your options are endless.

These are some of our favorite ways you can use wood to give your room more texture: built-in shelving or cabinetry (we love the look of live edge wood), exposed beams or paneling for the ceiling, a bit of butcher’s block or a standout island in the kitchen, or giving your home’s trim work an upgrade.

Customize with Concrete

Concrete has been trending for quite a while in countertop applications, but why not go further and use concrete’s unique quality in any room in your home? We took advantage of concrete’s limitless texture offerings in this Council Bluffs family room by designing a one of a kind fireplace surround and open shelving. Using a mold with rattan twigs, we created a contrasting furrowed surface to compliment the smooth matte finish. We love the industrial vibe that concrete brings to this room pulling it from traditional to transitional.

Concrete is also being used to decorate interior walls, for furniture, custom sinks, showers, and even bathtubs. A quick browse on google and you can see that concrete goes far beyond gray industrial as you can find ideas in any color of the rainbow. If you are thinking about concrete in your home, we recommend calling a professional on this one.

Where can your home benefit from some added texture? Stop and give yourself a home tour and look with fresh eyes. What room might just be needing a soft wood accent like a new custom built-in, and which one might benefit from a large-scale refresh?
A place for everything...

A) Pull-Out Base Cabinet Organizers
From your waste container to chrome baskets, Rev-A-Shelf designed cabinet accessories with one goal in mind: easy access & organization.

- Sara Lorenz, UDCP, T. Hurt Construction

City of Omaha Licensed Contractors
As of September 1, 2012, the City of Omaha instated a requirement that contractors in Omaha be licensed when doing construction work for hire on a project that requires a building permit. Many surrounding areas, such as Bellevue and Council Bluffs are affected by this requirement as well. Contractors are required to pass examinations in different classes of construction and can only pull permits in the class for which they test. Please see the classes below and know that all our NARI contractor members doing work in the Greater Omaha area are required to have their licensing in order to be listed in our Buyer’s Guide where they are color-coded for your reference.

<table>

Before you renovate
Find a lead-safe certified renovation firm in your area. Renovations, repair jobs and paint jobs in pre-1978 homes and buildings can create significant amounts of lead-based paint dust. If your contractor will disturb lead-based paint while renovating, repairing or painting your home, he or she must be trained in lead-safe work practices. Below is a list of NARI members who are EPA Certified. Visit www2.epa.gov/lead/ for more details and the most up-to-date list of EPA certified lead renovation firms.

EPA Certified Renovation Firms

We completely agree. That's why Pella is passionately committed to bringing you windows and doors that transform your home into the place you've always dreamed of. With Pella, you are free to express yourself with a stunning array of unique and innovative window and door design choices. Then you can just sit back and savor the view. After all, you've earned it.
Builders Supply Company is devoted entirely to helping you bring your building, remodeling or project ideas to life.

Builders Supply’s Home Design Center is one of the most comprehensive and innovative home showcases in the United States. Walking into the Home Design Center is like having a contemporary living magazine come to life right in front of you. There are hundreds of options for cabinets, doors and windows, fireplaces, decks, and so much more. Our beautiful “real life” displays enable you to get a first hand look at the products you’re considering. Whether building a new home or updating an existing one, our professional design staff is ready to assist you.

We’ve provided you with excellent service and stood by our products since 1951. You can expect nothing less every day we’re on the job with you.
